Customer Reviews

Read the description carefully. This book has chords and lyrics, but the tab is extremely limited. If you read music you may be frustrated - not because of the tab, but because you are totally limited to accompaniment. If you don't happen to know a melody? No help here..go to the net to listen...a real pain. A melody line in the tradition of a fake book would have been nice. There are some fingerpicking patterns which are helpful in some instances. I will use my limited skill/imagination and use the book it like an odd form of a fake book.. I expect to get some benefit from it, just not what I expected.My response to the book is there just isn't enough here. I am not an experienced expert, but rather a self-taught learner with only about a year of experience.

Product shipped quick and was in great condition. However the boom was not what I was expecting.

All it shows is the chords, very basic and does not even have the strumming patterns on all the songs. Only get this book if you are interested in rhythm only.

This book was perfect for me and I have been able to self teach myself guitar using this book. The songs are great and easy to follow. Definately would be this product again!

Very nice book of songs to play. I bought this for my son and he loves it!
