Customer Reviews

I have the first printing of the 3rd edition and it is riddled with mistakes; mostly in the practice problems. If you buy it, make sure you get the 2nd printing of the 3rd edition. I believe the first printing has at least 70 mistakes. It is very frustrating when you are working your way through a problem to be confronted with numbers that come from nowhere. The publisher does have corrections on their website, but do yourself a favor and make sure you buy the 2nd printing.

We love this curriculum. My kids come alive with science now.
