# Solos For Young Violinists, Vol. 3

## Synopsis

Solos for Young Violinists is a graded series of works ranging from elementary to advanced levels representing an exciting variety of styles and techniques for violinists -- a valuable resource for teachers and students of all ages. Many of the works in this collection have long been recognized as stepping stones to the major violin repertoire, while others are newly published pieces for further choices of study. This title is available in Music Prodigy.

## Book Information

Paperback: 72 pages

Publisher: Alfred Music; Pck edition (January 1, 1997)

Language: English

ISBN-10: 0874879906

ISBN-13: 978-0874879902

Product Dimensions: 0.2 x 8.8 x 11.5 inches

Shipping Weight: 5.6 ounces (View shipping rates and policies)

Average Customer Review: 3.4 out of 5 starsÂ  See all reviewsÂ  (7 customer reviews)

Best Sellers Rank: #39,276 in Books (See Top 100 in Books) #53 inÂ  Books > Arts & Photography > Music > Instruments > Strings > Violins #386 inÂ  Books > Arts & Photography > Music > Theory, Composition & Performance > Instruction & Study #11100 inÂ  Books > Reference

## Customer Reviews

Brian K. Barber is Professor of Child and Family Studies, Adjunct Professor of Psychology, and Founding Director, the Center for the Study of Youth and Political Violence, at the University of Tennessee. He received his Ph.D. from Brigham Young University in 1987. His interests' center on understanding the social, cultural, and political contexts of adolescent development. This Monograph culminates his effort to more precisely understand the parenting context of adolescent functioning, by synthesizing, clarifying, and refining past research, and by testing its parameters across the diversity of family experience internationally. The end goal of those pursuits is to provide useful, but manageable, information to the variety of caregivers, educators, practitioners, and policy makers who have adolescents as their concern. Heidi E. Stoltz is Assistant Professor of Child and Family Studies at the University of Tennessee. She received her Ph.D. from Brigham Young University in 2002. Her interests include refining research on the parent-child relationship with a special interest in clarifying the effects of mothers and fathers, and in maximizing the utility of research for application in child and family programs and their evaluation. She is fully responsible

for Chapters VI and VII of this Monograph in which she introduces, tests, and interprets dominance analysis as an innovative method for analyzing parenting data. She also participated in the writing of Chapter VIII and in editing the full manuscript. Joseph A. Olsen is Assistant Dean, the College of Family, Home, and Social Sciences at Brigham Young University. He received his Ph.D. from Brigham Young University in 1994. His interests center on the quantitative study of human development, personal relationships, and social interaction, with a particular focus on using structural equation and multilevel models to study small groups and microsocial contexts. He conducted all of the empirical analyses in Chapters IV and V of this Monograph, he consulted on the analyses reported on in Chapters VI and VII, and he assisted in editing the manuscript. W. Andrew Collins (Ph.D., Stanford University, 1971) is professor at the Institute of Child Development, University of Minnesota. He has written widely about parent-adolescent relationships and influences during adolescence and peer and romantic relationships during adolescence and early adulthood. In collaboration with Byron Egeland and L. Alan Sroufe, he is engaged in longitudinal research on social relationships and influences from birth to adulthood. He is a past president of the Society for Research on Adolescence and past secretary of the Society for Research in Child Development. Margaret Burchinal is the Director of the Design and Statistical Computing Unit at the FPG Child Development Institute and is a Research Professor in the Psychology. She has served as the primary statistician for many educational studies of early childhood, including the 11-state Pre-Kindergarten Evaluation for the National Center for Early Learning and Development, the longitudinal study of 1300 children in NICHD Study of Early Child Care; the four-state evaluation of child care in the Cost, Quality, and Child Outcomes Study. As an applied methodologist, she has helped to demonstrate that sophisticated methods such as meta-analysis (Burchinal, Peisner-Feinberg, Bryant, & Clifford, 2000), fixed-effect modeling (NICHD ECCRN & Duncan, 2003), hierarchical linear modeling, piecewise regression (Campbell, Pungello, Miller-Johnson, Burchinal, & Ramey, 2001), and generalized estimating equations provide educational researchers with advanced techniques to address important educational issues.
